CONTINIA

CORE VALUES

The core values of Continia

We dig in

We view challenges as exciting opportunities

We keep up-to-date and use the latest technology

We develop our skills and encourage high-quality solutions

We're persistent and solution-driven

We grow together

We embrace and respect individual differences

We trust each other and value strong relations

We communicate respectfully

We give and receive constructive feedback

Count on Continia

We practice a "can-do" attitude

We deliver what we promise in due time

We listen and share experiences, knowledge, and solutions

We're accountable and always go the extra mile

We work smart

We share our knowledge and individual strengths

We're innovative and driven by automation

We use our common sense

We benefit from diversity and various skillsets

CONTINIA

BRAND STORY

Brand story

Who are we? Times are continuously changing, but you can always count on Continia. Count on us to dig in, understand your challenges, and engineer solutions – available to the international market through our local partners. Our intelligent solutions add significant value to people and businesses by optimizing two of the most valuable commodities: time and data.

We get time to work for you by developing practical, reliable, easy-to-use, and price-competitive software solutions. Continia solutions automate and digitalize workflows in the backbone of most companies: the financial department. With more than 30 years of experience, we know that you can't buy back time. Don't waste it – spend it wisely.

To us, time is everything. Our clients count on our solutions and support for their businesses to run smoothly and seamlessly every day – that's our promise to you. We also ensure we can count on each other as colleagues and fellow Continians.

All Continians believe that time is the most valuable asset in business and life. Ask us what we do and whether you should work with us. We'll say: ***It's about time!***

CONTINIA

OUR LOGO

The Continia logo

The logomark symbolizes two entities intersecting with each other, while also vaguely resembling the silhouette of an hourglass. It serves as a subtle nod to the value and functional features of Continia's solutions.

Company name

In 2009, Celenia Software announced the sale of its transaction-based add-ons to six former colleagues. The new company was named Continia, merging the words "continue" and "Celenia" – symbolizing that Continia is a continuation of Celenia.

Displayed here are the three variants of the logo.

PRIMARY

This logo variant is the primary version of Continia's visual profile. This means that in nearly every use case, this is the logo you should use.

PRIMARY WITH PAYOFF

We also have a variant with our slogan attached. Its use is more specific and should only be applied when the purpose is to highlight or emphasize "It's about time."

SECONDARY

This variant should only be used in highly specific cases where the logomark has been relocated elsewhere on the canvas or visual surface of the design.

The same rules also apply for the solution logos.

Please do not:

1. Trim the logo.
2. Rotate or squash/stretch the logo.
3. Outline the logo.
4. Use obvious effects on the logo.
5. Change the color of the logo to other than: Tech Blue, Innovation Blue, Light Blue, or White.
6. Fill the logo with gradients.
7. Change the spacing between the hourglass icon and Continia.
8. Use the logo on low contrast backgrounds.

Negative is used on dark and
colored backgrounds.

Positive is used on light
and neutral backgrounds.

Correct usage

To ensure correct and consistent use of the logo across various media and contexts, several guidelines and examples are provided based on different usage scenarios. These guidelines must always be followed to ensure a professional appearance.

Respect distance

There should always be clear space around the logo to ensure readability. The minimum distance between our logo and other elements is referred to as the “respect distance.” This is defined by the X-height of our name feature and can be measured starting from the “C” in the logo.

Correct use of primary logo

CONTINIA

GRAPHICS & 5TH ELEMENT

Quarter circle

In the logo icon and above the “I”s in Continia, you’ll find quarter-circle graphics. These elements can be used to create playful and exciting visuals.

Use of quarter circle example

Full circle

A combination of all four quarters forms a perfect circle. This circle can also be used to add an extra playful touch to our visuals!

Use of full circle example

Expense
Management

UI elements

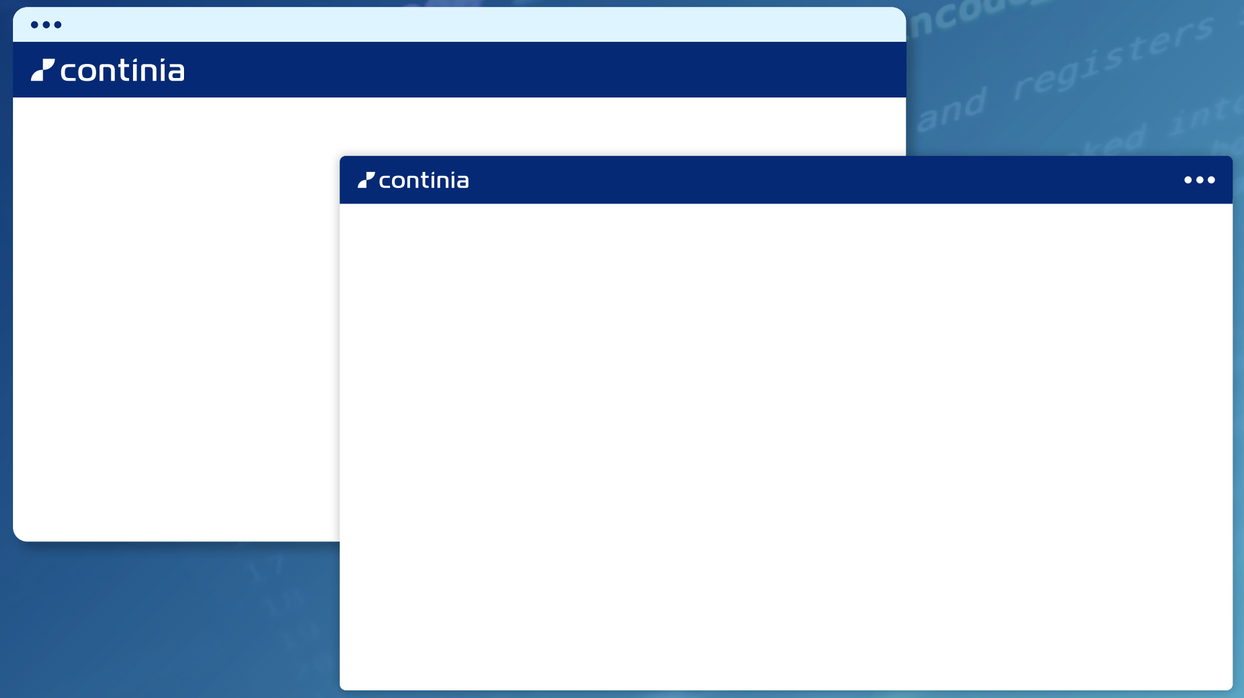

At Continia, we have developed UI elements that can be used to highlight a call to action, display Business Central screenshots, or showcase specific types of content such as images or videos.

What are UI elements?

UI elements mimic real-life user interface components. The pop-up window is used to display solutions, Business Central screenshots, videos, images, or thumbnails, etc.

Buttons are used to indicate specific actions related to the content in the pop-up window. The mouse cursor is often included to emphasize the button's interactivity or illustrate that a button is clickable, especially in interactive PDFs like this one!

Pop-up windows (2 versions)

Pop-up with YouTube video

YouTube video inside (pop-up)
+ moving pop-up with text

5th element

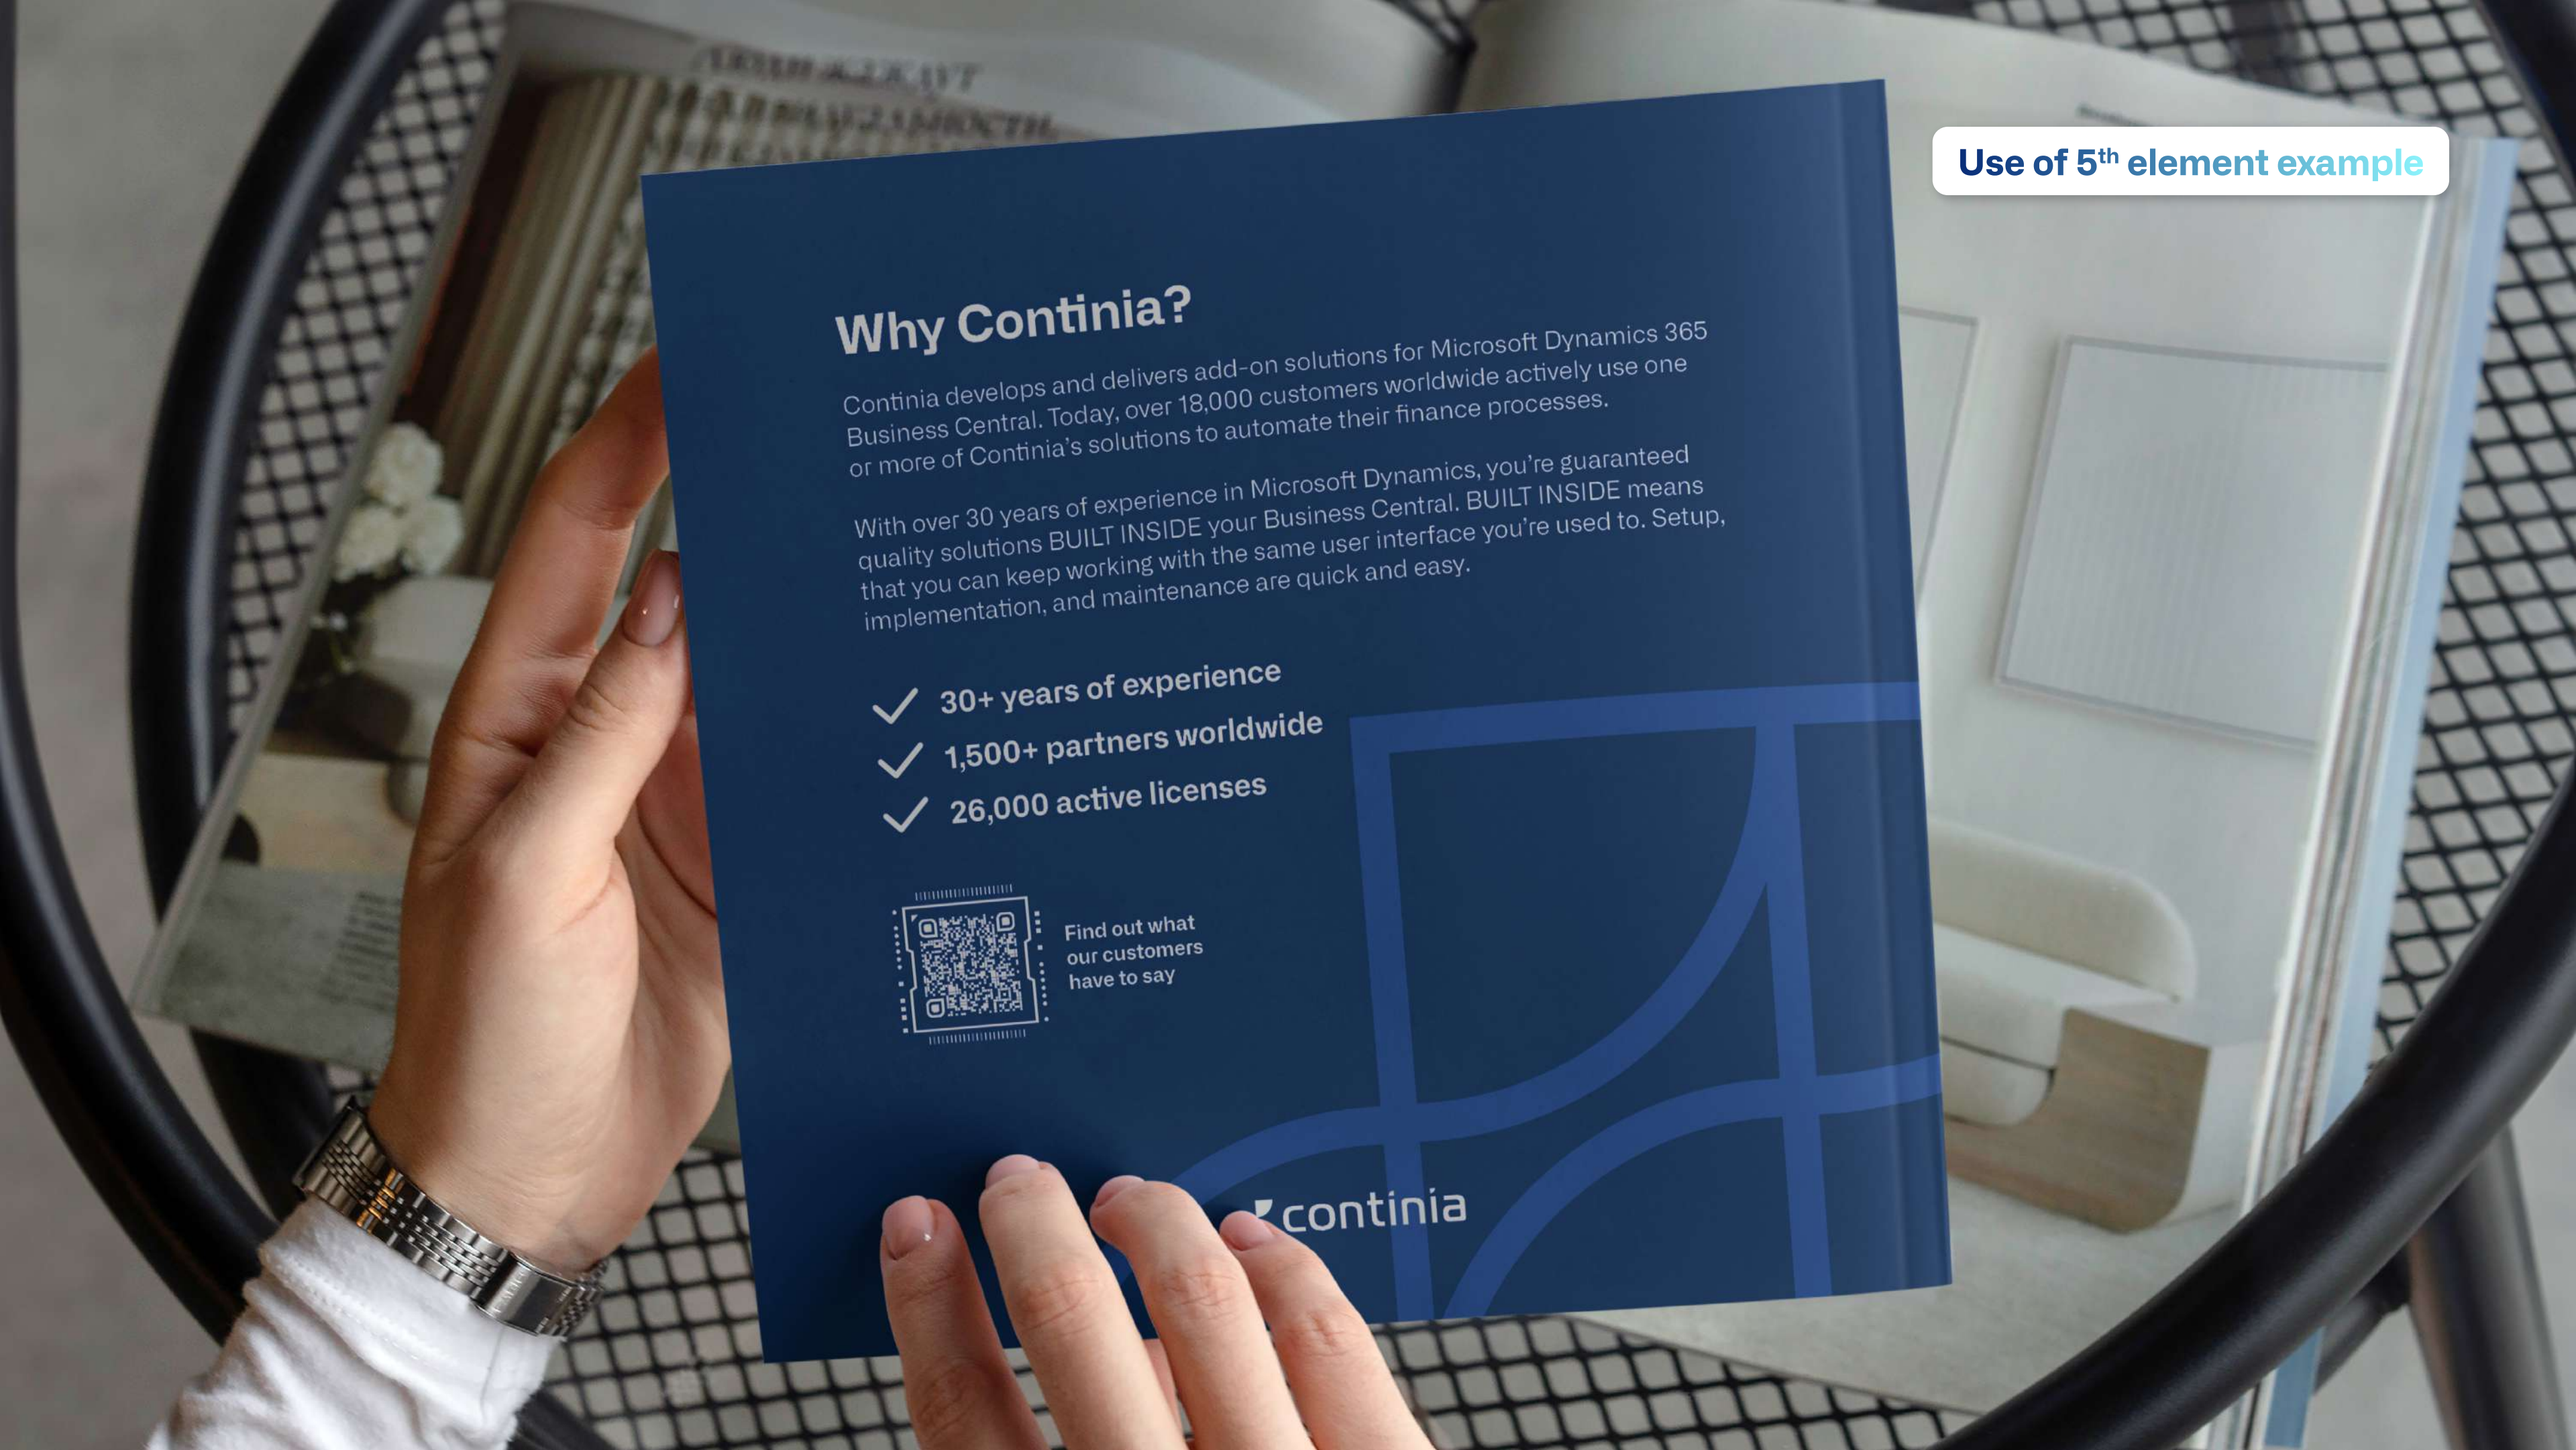

The 5th element serves as a visual tool to promote brand recognition across various touchpoints, surfaces, and visuals. Rooted in our payoff, “It’s about time,” and our secondary logo, the 5th element acts as a visual extension of our overall identity.

CONTINIA

OUR COLORS

Our colors

The Continia color palette consists of two primary brand colors (Tech Blue and Innovation Blue), along with one primary functional color (Light Blue).

The secondary functional colors are primarily intended for web usage or other design solutions that require color flexibility, such as differentiating products or enhancing visual communication.

This brand guide primarily utilizes the brand colors, with the primary functional colors used sparingly to add variation.

CONTINIA

TYPOGRAPHY

Continia’s font choice

The primary typography choice for Continia is Alliance No. 2, a modern and techy font that aligns with our industry category. Its small quirky details and curves give it a unique, personal touch while maintaining a professional appearance.

CONTINIA

ICONS

The Font Awesome library

The icons we use at Continia are sourced from the Font Awesome library, with the light version being the common style used across our brand. These icons can be applied in various ways, whether to explain concepts or in a creative and illustrative manner!

If you wish to acess the library, please contact **the marketing team.**

Icon rules

At Continia, we follow specific guidelines for the icons we use. As mentioned earlier, we are committed to the light version of the Font Awesome library. Additionally, we have specific use cases for icon colors and associations between particular icons and specific words.

The only colors allowed for the icons are Tech Blue, Innovation Blue, Light Blue, and White.

It is also acceptable to use a gradient version of the icon, combining Tech Blue and Innovation Blue.

Correct use of icons

Automate your document distribution with Continia Document Output

Get an overview of all your outgoing documents

Streamline your document distribution with Continia Document Output so you can easily manage and send various documents, such as invoices, purchase orders, and account statements. You can also save time with a clear overview of all your sent and drafted documents.

CONTINIA

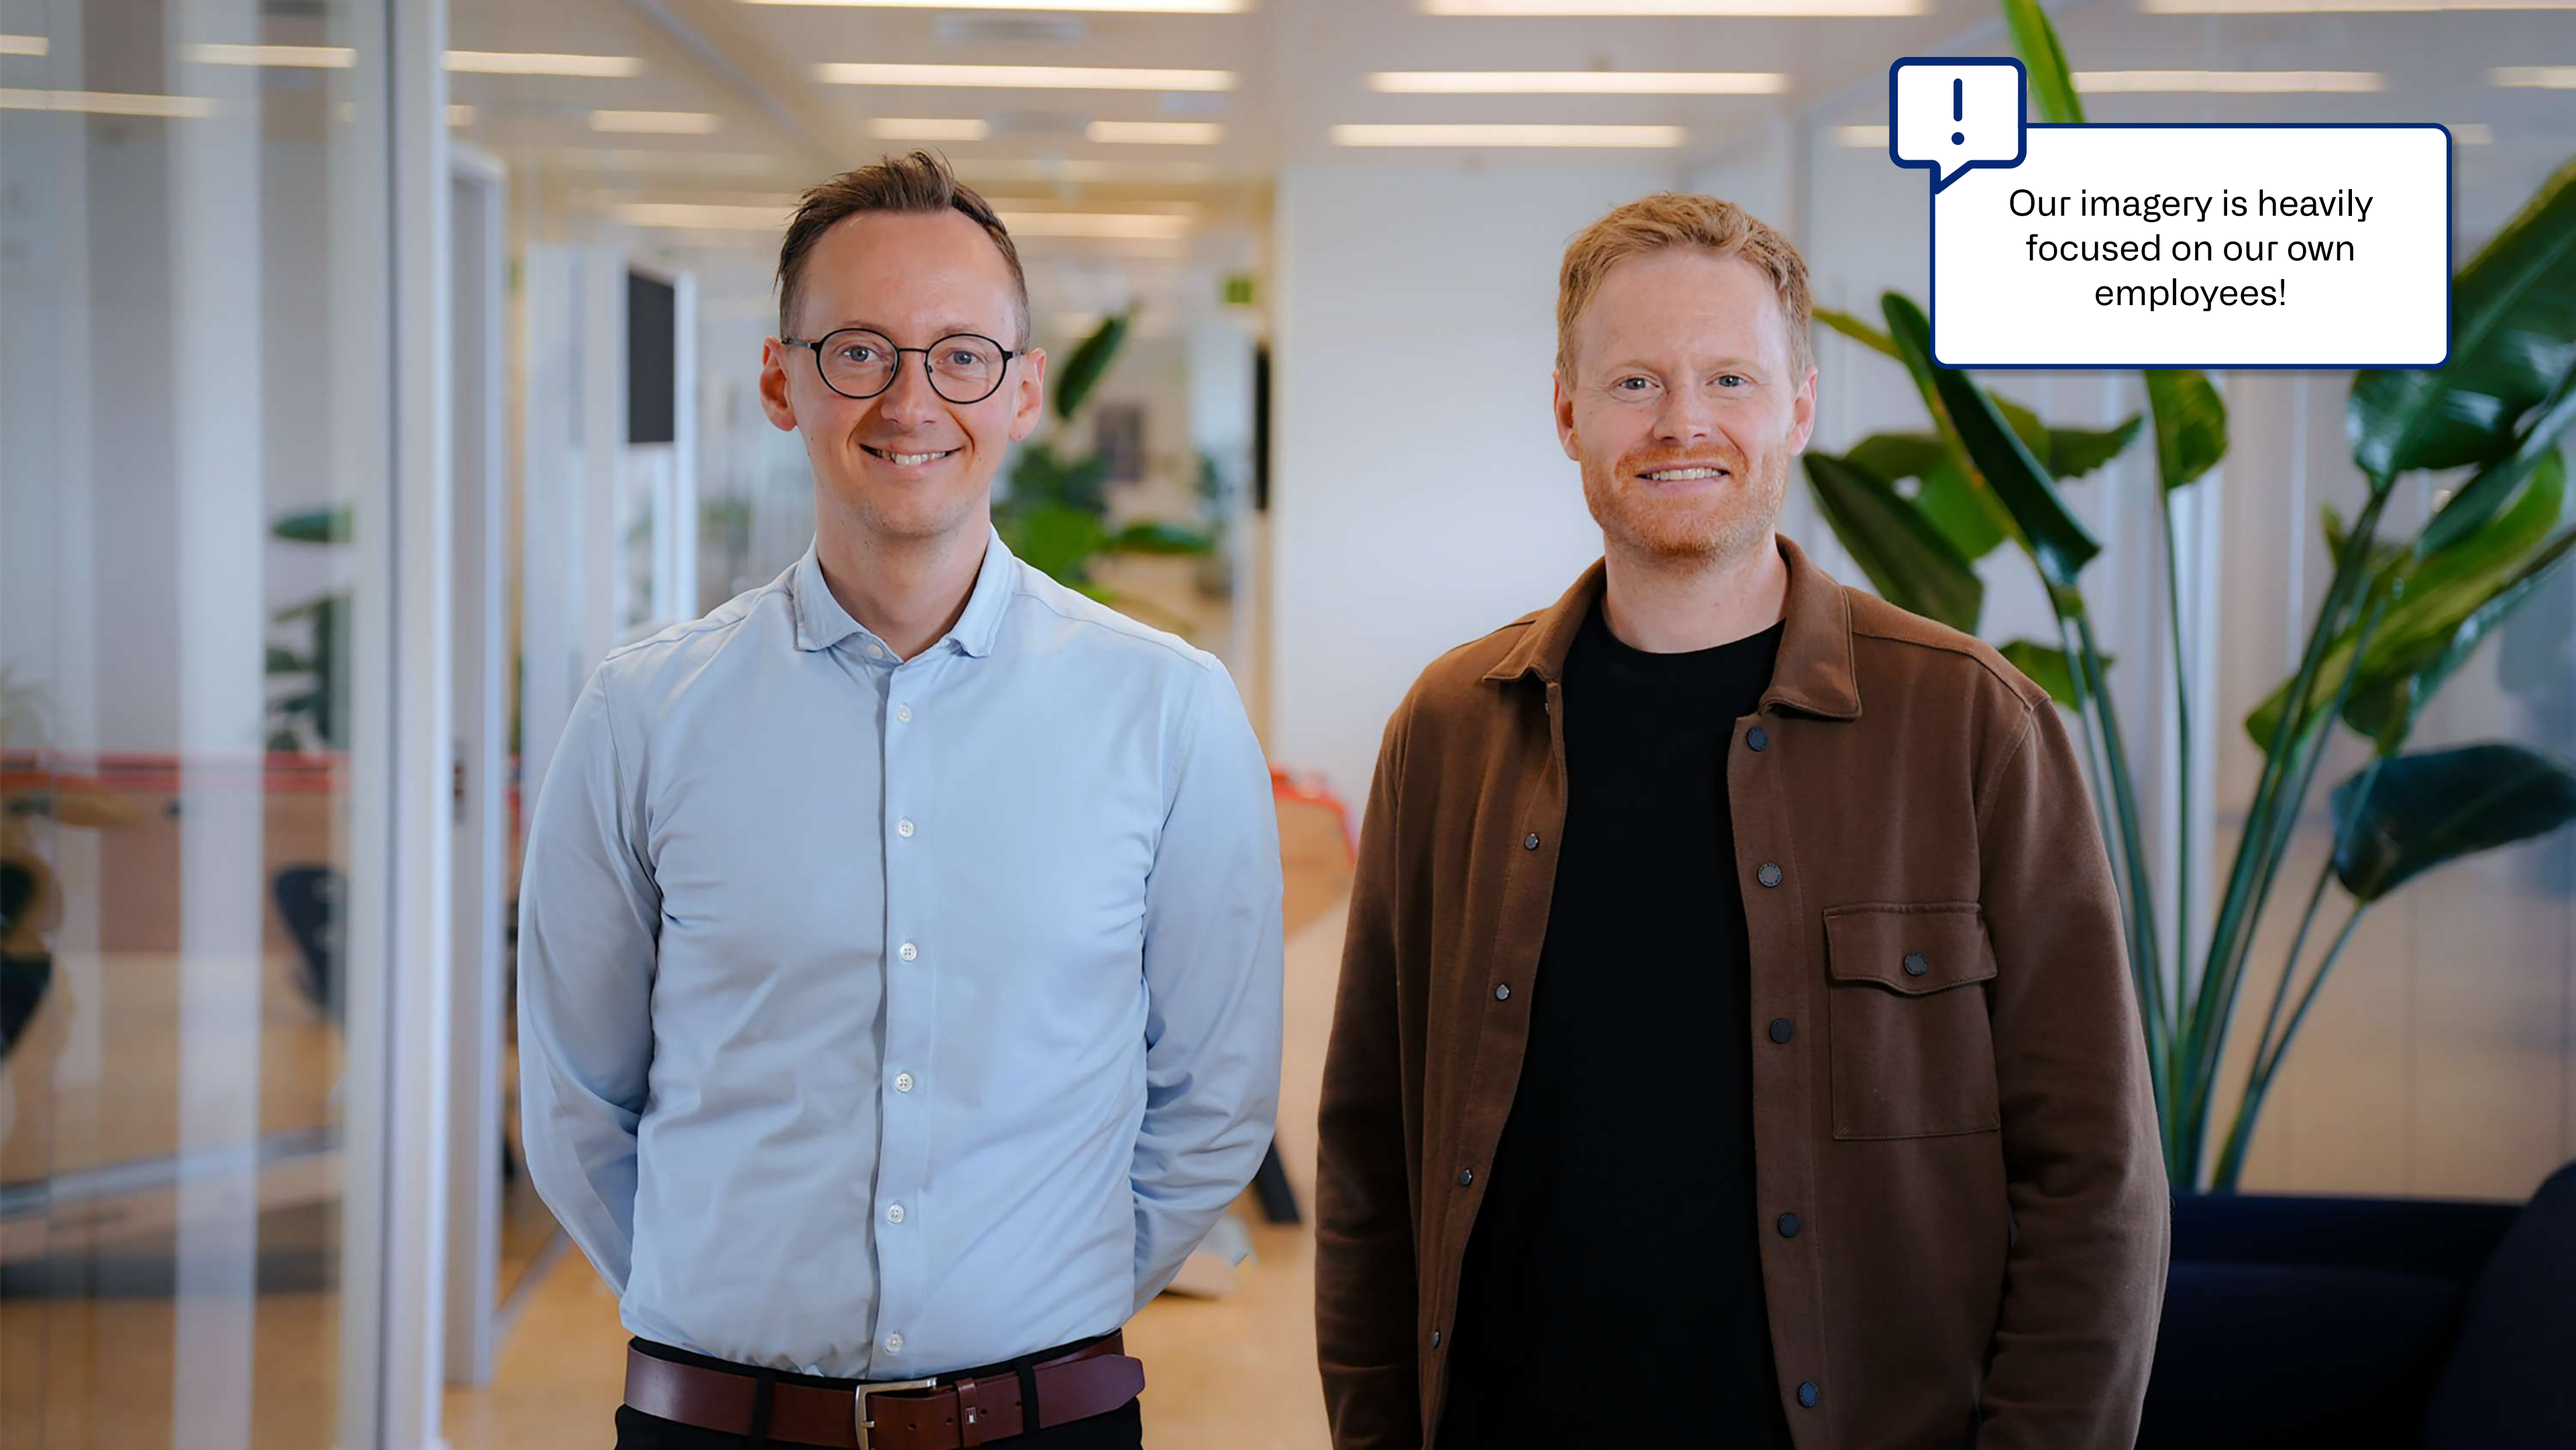

PHOTOGRAPHY

Our photo style

Continia’s photography style is centered around our employees! The goal is to create a warm and welcoming feeling toward our partners and customers.

In specific cases, we may also need to capture photo scenarios that illustrate certain features or actions within our solutions.

Our imagery is heavily focused on our own employees!

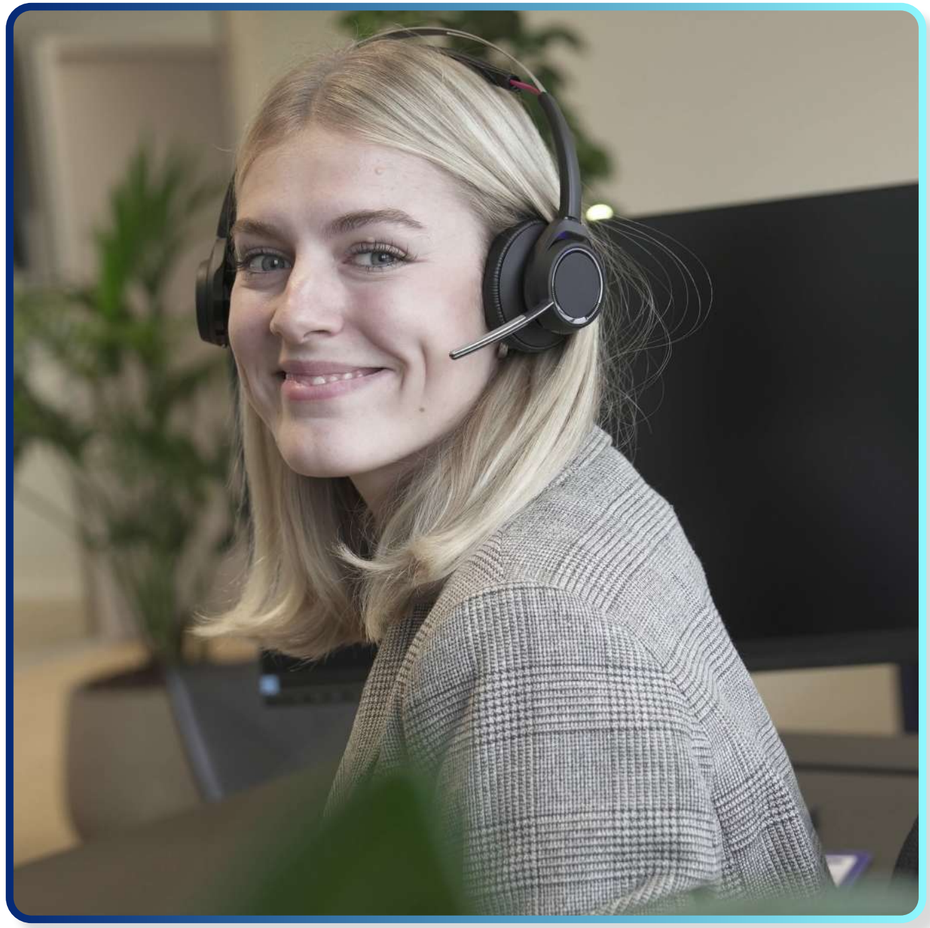

Favorable photo composition

When taking a photo, please keep the composition in mind, so it can be used correctly in a graphical context.

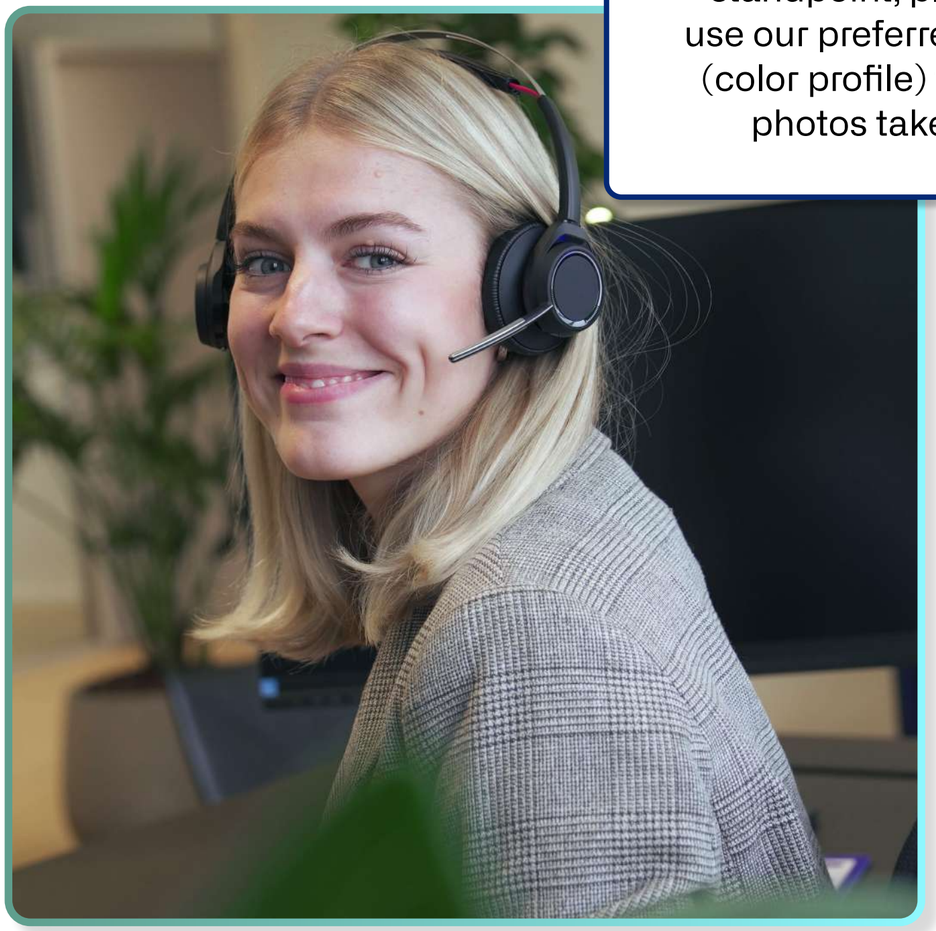

Prefered LUTs for photography

From a post-production standpoint, please use our preferred LUT (color profile) for all photos taken.

Before

After

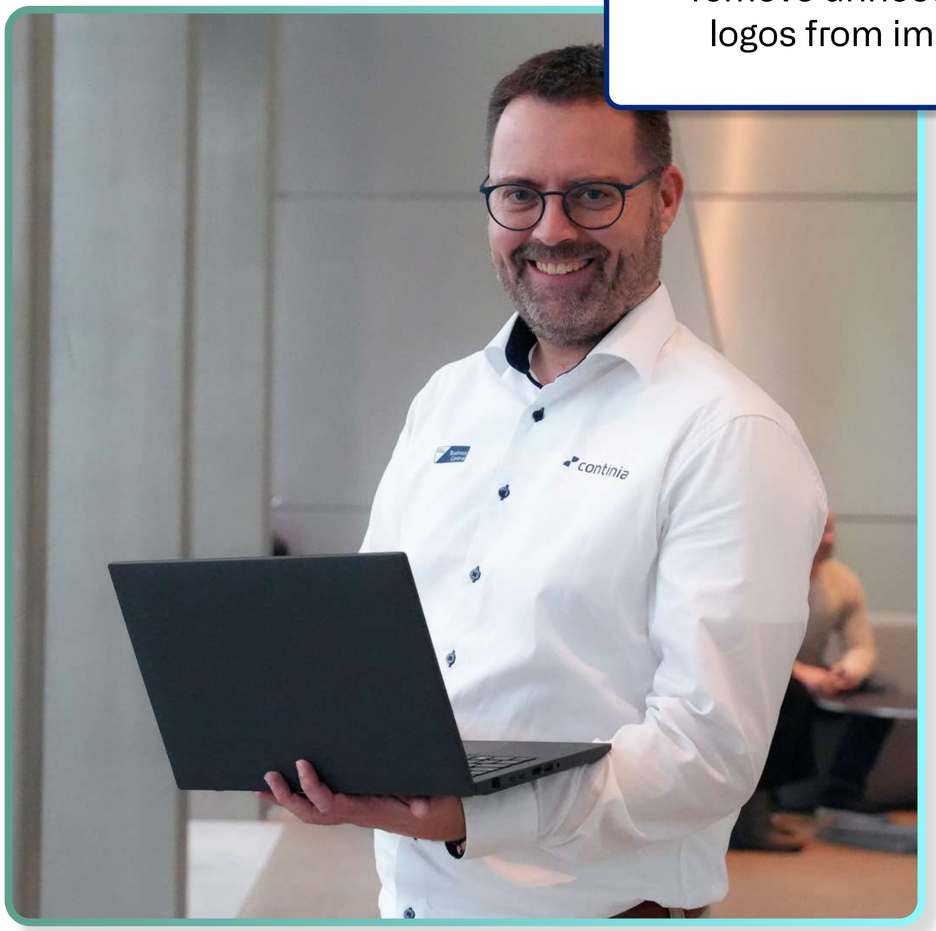

Photos are often shot in a way that illustrates specific actions or features within our solutions.

Removal of other brands/logos

We also make sure to remove unnecessary logos from images.

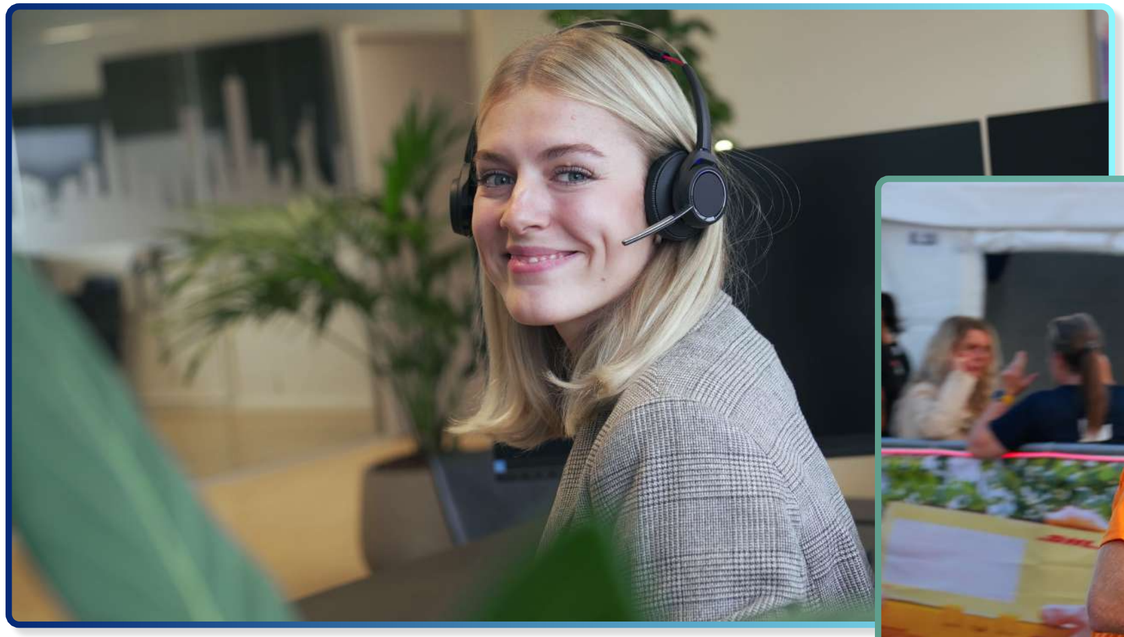

Before

After

Photo environment (indoor/outdoor)

We have created specialized LUTs that can be applied for both indoor and outdoor environments.

Indoor

Outdoor

CONTINIA

PRINT MEDIA

Our print media

At Continia, we produce various types of printable media, including conference booths, flyers, brochures, roll-ups, and more.

In this section of the guide, we will take a closer look at booth and brochure design.

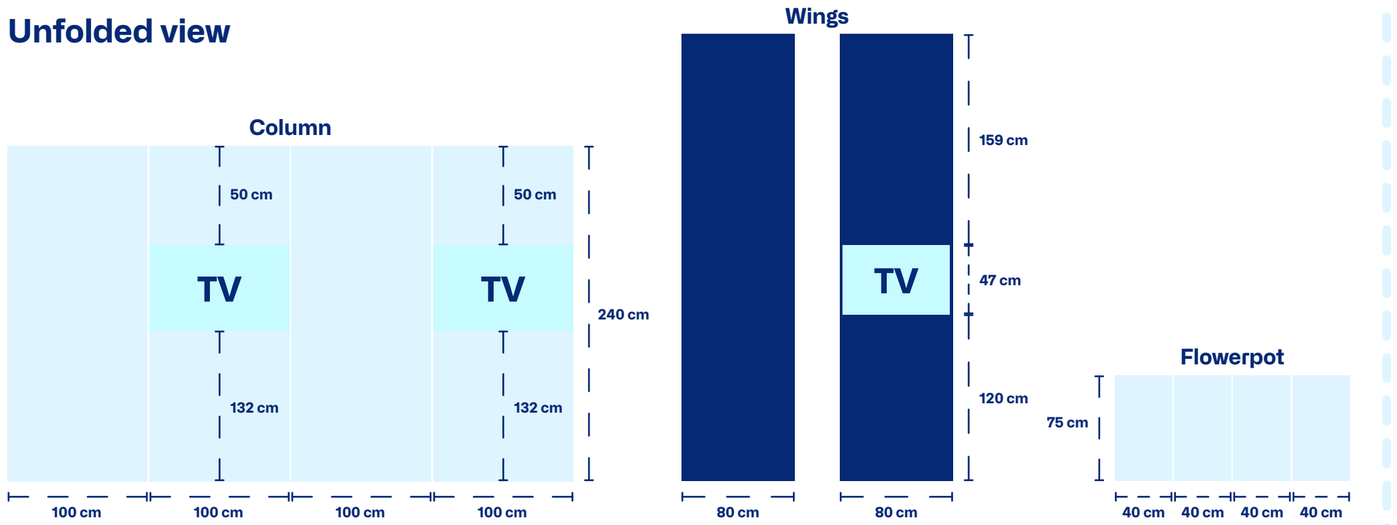

Directions EMEA 2024 booth

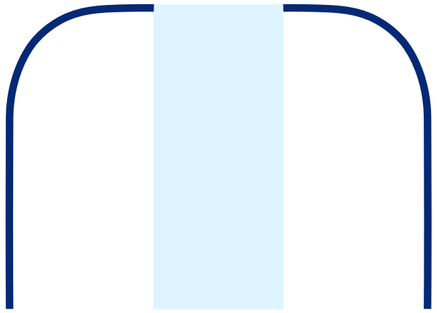

These are the schematics for the Directions EMEA booth for 2024. The booth consists of four columns, two wings, and a four-sided flowerpot.

For all conference booths, we create the standard print files in Adobe InDesign. We then produce a 3D model in Blender, representing the schematics to visualize how the booth will appear in real life.

Brochures

Here is an example of a brochure created for the general Continia brand. The brochure explains who Continia is, what each individual solution does, and the specific problems they solve!

Speed up & stay compliant with electronic invoicing

Send & receive your e-documents in seconds - directly from your Business Central

Secure document exchange with Continia Delivery Network

Continia Delivery Network seamlessly integrates with the Peppol eDelivery Network, enabling secure document exchange using Document Capture and Document Output.

Continia Delivery Network allows you to send and receive e-invoices and other e-documents in your required format, helping you stay compliant and secure all your sensitive information.

Key benefits of electronic invoicing

Receive and send all your e-invoices through Business Central.

Be a preferred supplier for companies in the public sector.

Secure all sensitive data *to ensure high document accuracy and validation.*

Safely connect to the Peppol Network through Continia Delivery Network.

Handle all e-documents in the same way you handle your PDFs.

Protect your company data

Increase your document security and validity by sending and receiving all your important documents, such as invoices and credit notes, as e-documents. Using electronic document formats such as Peppol BIS3 (XML), guarantees that all your sensitive information is encrypted and secure - helping you follow all regulations, such as GDPR.

CONTINIA

DIGITAL MEDIA

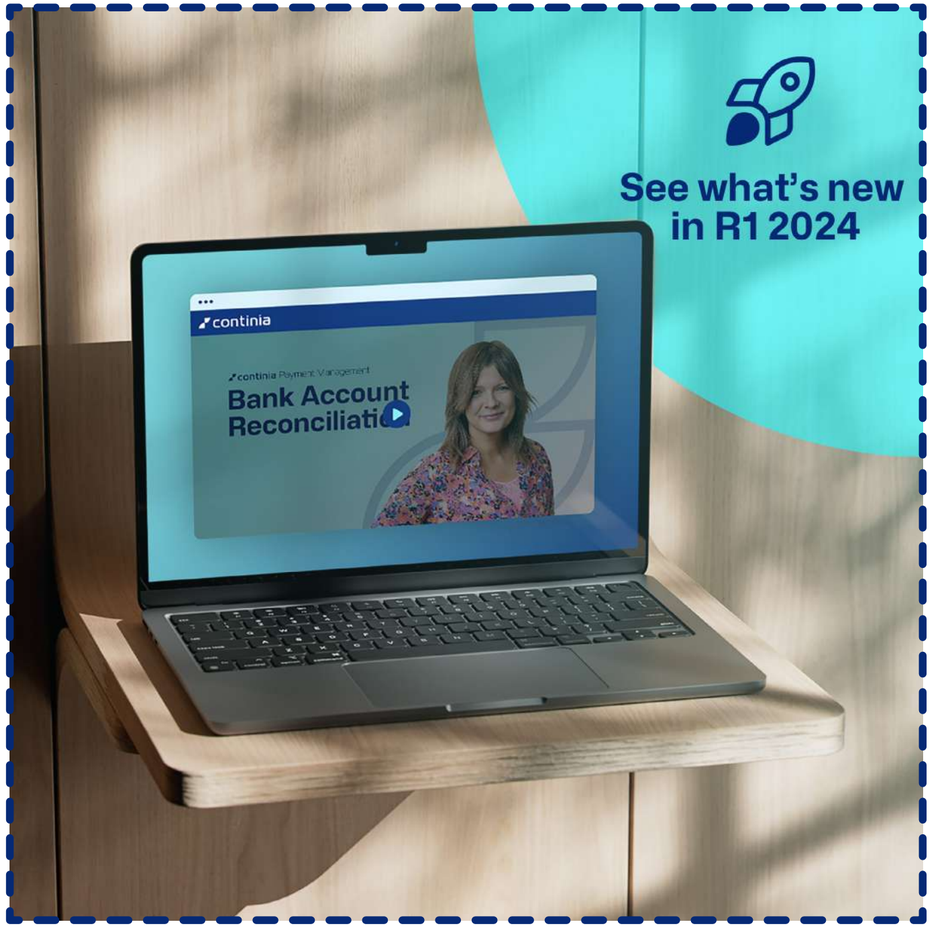

Digital media

At Continia, we produce a wide range of media types, with a strong focus on digital media, including newsletters, videos, animations, carousels, and more.

In the following pages, we'll explore the different styles used for each media type.

Sustainability: Reshaping corporate success

Starting in January 2023, the Corporate Sustainability Reporting Directive (CSRD) made Environmental, Social, and Governance (ESG) reporting mandatory for many businesses in the EU. Mastering carbon accounting is essential for businesses aiming to thrive and comply with evolving regulations.

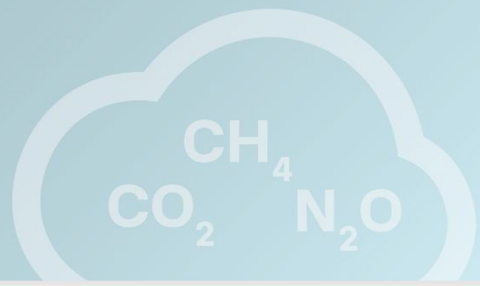

What is carbon accounting?

Carbon accounting is a systematic approach to measure, manage, and report greenhouse gas (GHG) emissions. It involves identifying emission sources, quantifying emissions, and implementing strategies to reduce them. Accurate carbon accounting is essential for businesses to track their environmental impact and meet regulatory requirements.

The Greenhouse Gas Protocol

The Greenhouse Gas Protocol (GHGP) is a popular global standard for measuring greenhouse gas emissions. Used by 92% of Fortune 500 companies, it helps businesses understand their emissions, where they come from, and how to report them.

2000x2000 px

CONTINIA

VIDEOGRAPHY

Our video style

Continia’s video style inherits many aspects from our photography style, including LUTs, compositions, and use cases. However, it also incorporates its own elements, such as frames per second, transitions, animation effects, and social media thumbnails.

Thumbnail styles for YouTube

This specific thumbnail is designed for the “What’s New” videos for each solution.

1920x1080 px

Thumbnail styles for YouTube

This specific thumbnail is created for a single function in a solution.

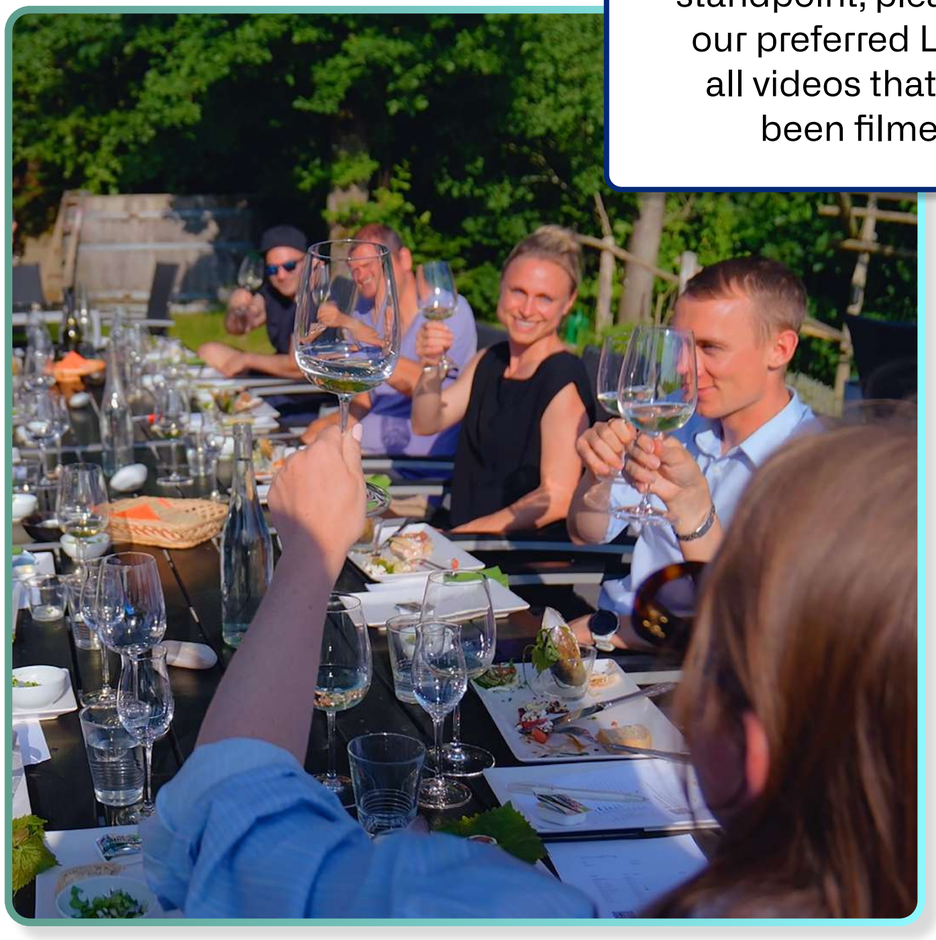

1920x1080 px

Preferred LUTs for videography

From a post-production standpoint, please use our preferred LUT for all videos that have been filmed.

Before

After

Composition and resolution for recording

The primary resolution for shooting video is 4K (3840x2160) at 25 fps.

3840x2160 px / 25 fps

Composition and resolution for recording

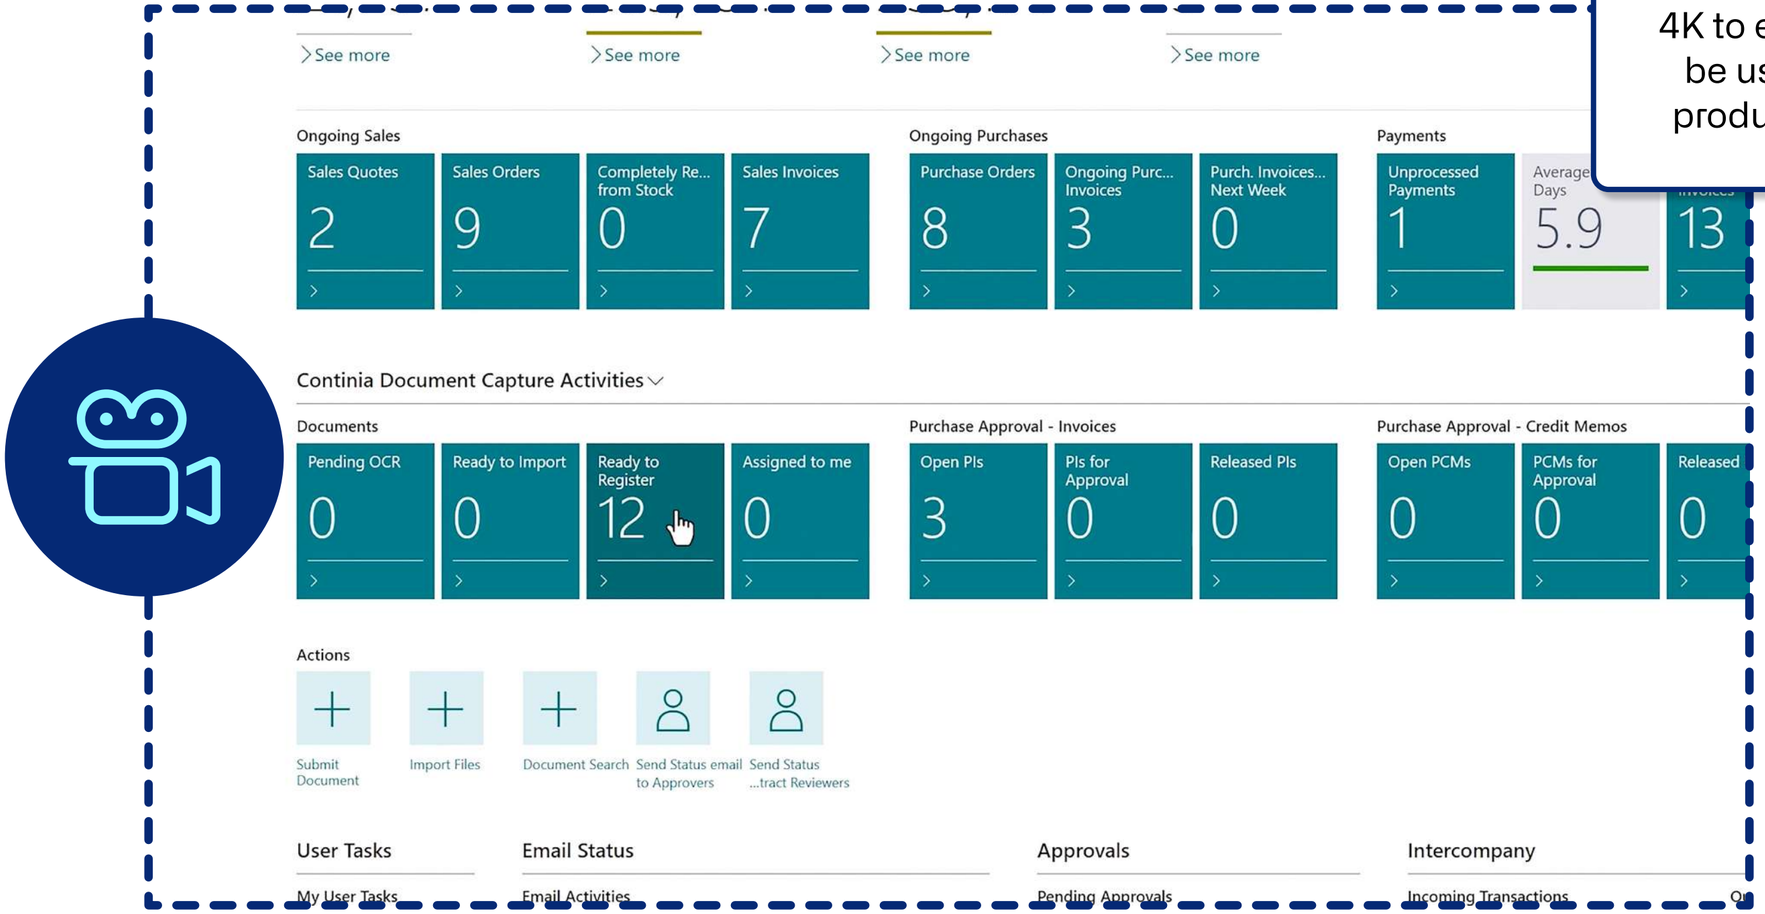

The benefit of shooting in 4K is that it can be rescaled to a 1:1 aspect ratio, which is an ideal format for SoMe.

1080x1080 px

Screen recordings and settings

The primary resolution for recording must be 4K to ensure that it can be used for all post-production purposes.

3840x2160 px / 30 fps

Screen recordings and effects

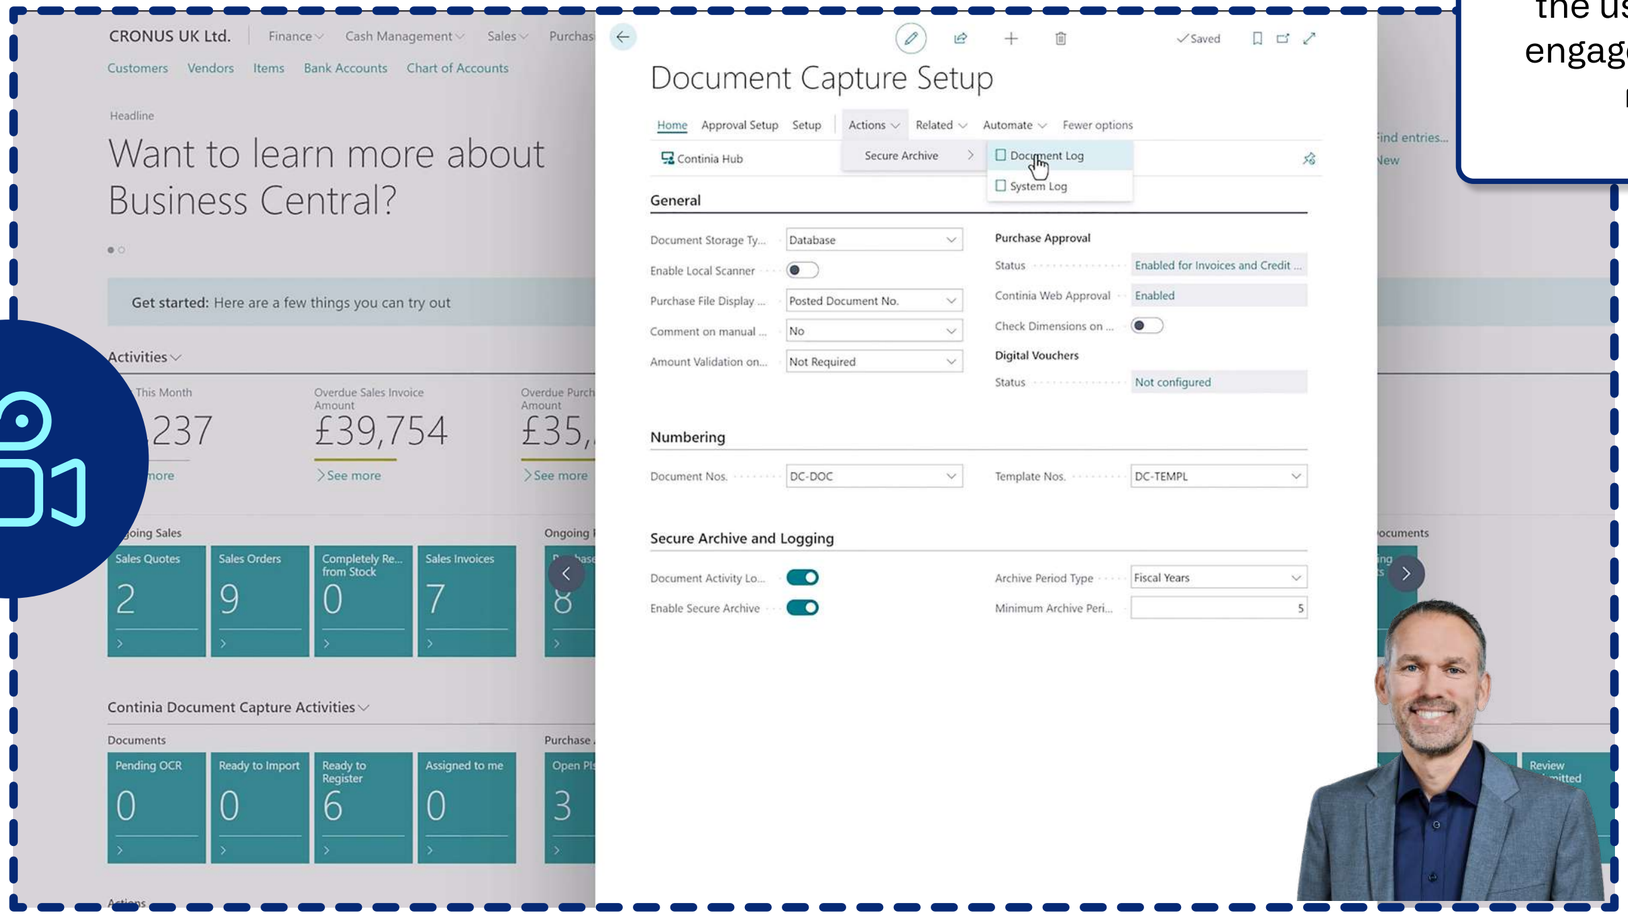

Please make sure not to use any effects or transitions in the recording. Let the post-production team take care of it.

3840x2160 px / 30 fps

Screen recordings and voice over

We highly recommend the use of facecam to engage with the screen recordings!

3840x2160 px / 30 fps

CONTINIA

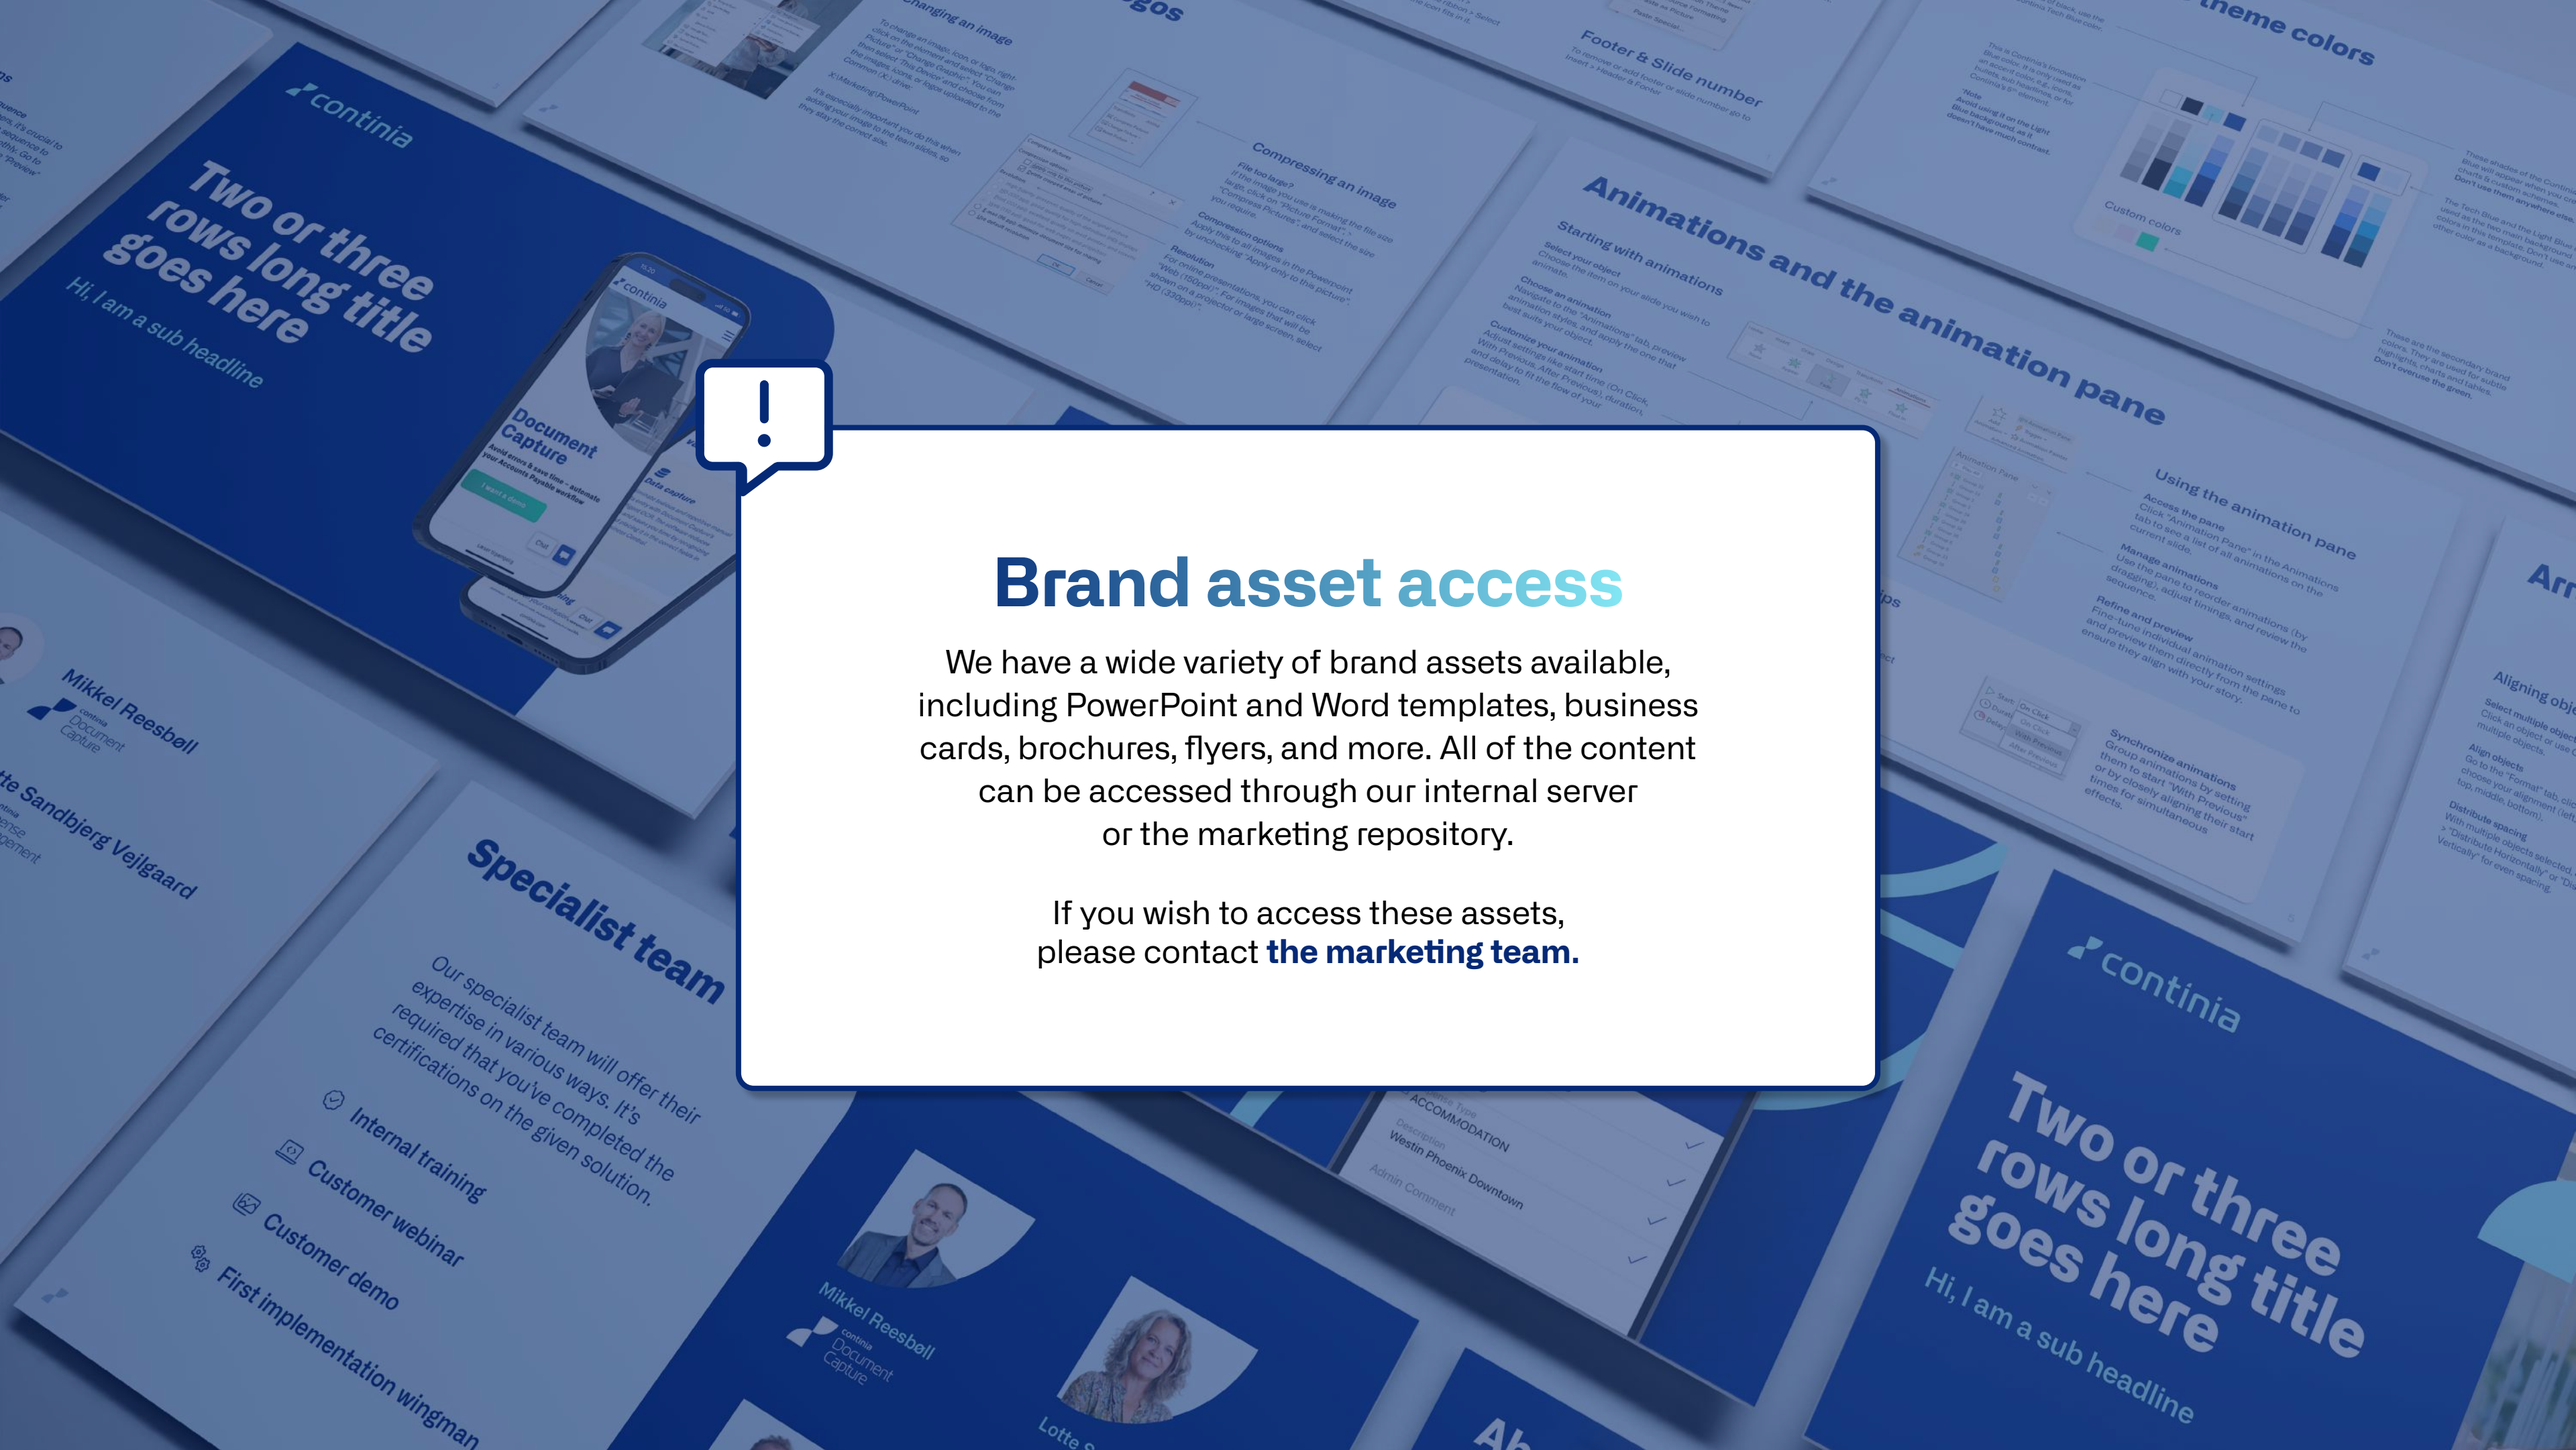

BRAND ASSETS

Continia brand assets

At Continia, we have a variety of brand assets available for the entire organization to use.

These assets have been developed by the marketing team to align with our brand guidelines and ensure a consistent visual and communicative style throughout the Continia brand.

Brand asset access

We have a wide variety of brand assets available, including PowerPoint and Word templates, business cards, brochures, flyers, and more. All of the content can be accessed through our internal server or the marketing repository.

If you wish to access these assets, please contact **the marketing team.**
